

1. Design a HTML page with 2 frames divided vertically (30,70). The left frame stores the link and when clicked corresponding page will be loaded in the right frame. Initially home page will be loaded in the right frame.

a. The Link in the left frame includes About Us, any professional degree admission (Engineering/Medical) and contact us.

b. When cursor is moved over the link, the colour should be changed to red.

c. The admission form should include details of name, username (only alphanumeric), DOB, contact number (country code as drop down menu) , Sex, and marks (maths, physics and chemistry in case of engineering / Biology, physics and chemistry for medical).

d. When the form is submitted, the cut-off mark will be calculated as an alert message if their age lies between 17-23 and 50% in all the three subjects else will display not eligible. Eligibility will be checked based on the marks entered (maths, physics and chemistry in case of engineering / Biology, physics and chemistry for medical)
